DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Mashita et al (JP 2001305773: HCAPLUS 135:350468); and Seda et al (JP08208820: HCAPLUS 125:342810).

The Chemical Abstracts of the cited prior arts disclose an electrophotographic photoreceptor comprising a polymer having charge transfer property, and which polymer is a polyamine having structural units as claimed.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mashita et al "773 or Seda et al "820.

The disclosures of the cited prior arts are as discussed supra. The prior arts disclose a polyamine comprising structural units which are obtained from the reaction of an aminocarboxylic acid and a diol as claimed. It is the Examiner's position that the

claimed method would have been obvious to the ordinary practitioner based on the teachings of the cited prior arts as discussed above.

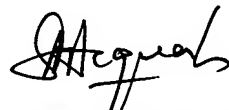

3. References listed on PTO-1449 have been made part of the record.
